1. Product and Company Identification

Material name: Copper Zinc Alloys
Revision date: 06-30-2011
Version #: 03
CAS #: Mixture
Product code: C21000, C22000, C23000, C24000, C26000, C26100, C26800, C27000, C27450, C28000, C31400, C31600, C36000, C37700, C44300, C46400, C67300, C67310, C67400, C69300, C69340, C83400, CGM-7, CA673-MOD, ADVSI, 422, 70/30, 80/20
MSDS Number: 3
Product use: Manufacturing
Manufacturer/Supplier: Concast Metal Products Company
131 Myoma Road (PO Box 816) Mars, PA 16046
dpl@concast.com or adk@concast.com
Telephone 1-800-626-7071
Contact Person: Dominic LeMaire or Andy Krowsoski
Emergency: 1-800-424-9300
Chemtrec (24-hrs)

2. Hazards Identification

Physical state: Solid.
Appearance: Solids, Rectangles, Shapes, Tubes, Clips, Shells and Turnings.
Emergency overview: WARNING
Harmful if inhaled or swallowed.
Possible reproductive hazard that may cause adverse reproductive effects based on animal data. May adversely affect the developing fetus based on animal data. Possible cancer hazard - may cause cancer based on animal data. Dusts may irritate the respiratory tract, skin and eyes.

OSHA regulatory status: This product is considered hazardous under 29 CFR 1910.1200 (Hazard Communication).

Potential health effects

Routes of exposure
Eye contact. Ingestion. Inhalation. Skin contact.

Eyes
Molten material will produce thermal burns. Elevated temperatures or mechanical action may form dust and fumes which may be irritating to the eyes.

Skin
May cause allergic skin reaction. Hot or molten material may produce thermal burns. Workers allergic to nickel may develop eczema or rashes.

Inhalation
Harmful if inhaled. Elevated temperatures or mechanical action may form dust and fumes which may be irritating to mucous membranes and respiratory tract.

Ingestion
Not relevant, due to the form of the product in its manufactured and shipped state. However: Harmful if swallowed.

Target organs
Lungs. Respiratory system.

Chronic effects
Heating above the melting point releases metallic oxides which may cause metal fume fever by inhalation. The symptoms are shivering, fever, malaise and muscular pain. Lead is accumulated in the body and may cause damage to the brain and nervous system after prolonged exposure. Contains nickel. Prolonged and repeated overexposure to dust and fumes can lead to benign pneumoconiosis (stannosis). The effects might be delayed.

Signs and symptoms

Potential environmental effects
Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.
3. Composition / Information on Ingredients

</tr>
</tbody>
</table>

Composition comments: All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume. The alloy contains additional alloying elements at concentrations below disclosure requirements. At temperatures above the melting point the alloys may liberate fumes containing oxides of alloying elements.

4. First Aid Measures

First aid procedures

- **Eye contact**: Do not rub eyes. Remove any contact lenses. Flush eyes thoroughly with water, taking care to rinse under eyelids. If irritation persists, continue flushing for 15 minutes, rinsing from time to time under eyelids. If discomfort continues, consult a physician.

- **Skin contact**: Contact with dust: Wash skin with soap and water. In case of allergic reaction or other skin disorders: Seek medical attention and bring along these instructions. In case of contact with hot or molten product, cool rapidly with water and seek immediate medical attention. Do not attempt to remove molten product from skin because skin will tear easily. Cuts or abrasions should be treated promptly with thorough cleansing of the affected area.

- **Inhalation**: In case of exposure to fumes or particulates: Get medical attention immediately!

- **Ingestion**: Rinse mouth thoroughly if dust is ingested. Only induce vomiting at the instruction of medical personnel. Get medical attention if any discomfort continues.

Notes to physician: Treat symptomatically. Symptoms may be delayed.

General advice: Get medical attention if any discomfort develops. Seek medical attention for all burns, regardless how minor they may seem. Show this safety data sheet to the doctor in attendance.

5. Fire Fighting Measures

Flammable properties: Solid metal is not flammable; however, finely divided metallic dust or powder may form an explosive mixture with air. In a fire, nickel may form nickel carbonyl, a highly toxic substance and known carcinogen.

Extinguishing media

- **Suitable extinguishing media**: Special powder against metal fires. Dry sand.

- **Unsuitable extinguishing media**: Do not use water or halogenated extinguishing media. Do not use water on molten metal: Explosion hazard could result.

Protection of firefighters

- Specific hazards arising from the chemical

- Protective equipment and precautions for firefighters

- **During fire, gases hazardous to health may be formed.**

- **Self-contained breathing apparatus and full protective clothing must be worn in case of fire.**

- Selection of respiratory protection for fire fighting: follow the general fire precautions indicated in the workplace.

Fire fighting equipment/instructions: Move containers from fire area if you can do it without risk.

Hazardous combustion products: Metal oxides. Aluminium oxides.

6. Accidental Release Measures

Personal precautions: Ensure adequate ventilation. Avoid inhalation of dust and contact with skin and eyes. Wear protective clothing as described in Section 8 of this safety data sheet.

Environmental precautions: Avoid release to the environment. Do not contaminate water.
Methods for containment
Not applicable.

Methods for cleaning up
Avoid dust formation. Allow spilled material to solidify and scrape up with shovels into a suitable container for recycle or disposal. Collect dust using a vacuum cleaner equipped with HEPA filter. If not possible, gently moisten dust before it is collected with shovel, broom or the like. The vacuum cleaner should be explosion-proofed. This material and its container must be disposed of as hazardous waste.

Other information
Clean up in accordance with all applicable regulations.

7. Handling and Storage
Handling
Follow special national provisions related to work with lead and its compounds. Pregnant women should not work with the product, if there is the least risk of lead exposure. Welding, burning, sawing, brazing, grinding or machining operations may generate fumes and dusts of metal oxides. Provide adequate ventilation. Avoid contact with sharp edges and hot surfaces. Avoid generation and spreading of dust and fumes. Avoid inhalation of dust and contact with skin and eyes. Avoid contact with hot or molten material. Dust clouds may be explosive under certain conditions. Take precautionary measures against static discharges when there is a risk of dust explosion. Use explosion-proof electrical equipment if airborne dust levels are high. To prevent and minimize fire or explosion risk from static accumulation and discharge, effectively bond and/or ground product transfer system. Wear appropriate personal protective equipment. Do not use water on molten metal. Do not eat, drink or smoke when using the product. Keep the workplace clean. Observe good industrial hygiene practices.

Storage
Keep dry. Store away from incompatible materials.

Engineering controls

Provide adequate ventilation. Observe Occupational Exposure Limits and minimize the risk of inhalation of dust. Ventilate as needed to control airborne dust. Use explosion-proof ventilation equipment if airborne dust levels are high. Special ventilation should be used to convey finely divided metallic dust generated by grinding, sawing etc., in order to eliminate explosion hazards. Follow the schedule for work place measurements when working with lead and its compounds.
Personal protective equipment

Eye / face protection Wear dust-resistant safety goggles where there is danger of eye contact. In addition to safety glasses or goggles, a welding helmet with appropriate shaded shield is required during welding, burning, or brazing. A face shield is recommended, in addition to safety glasses or goggles, during sawing, grinding, or machining.

Skin protection Wear suitable protective gloves to prevent cuts and abrasions. When material is heated, wear gloves to protect against thermal burns. Suitable gloves can be recommended by the glove supplier. Wear suitable protective clothing.

Respiratory protection When engineering controls are not sufficient to lower exposure levels below the applicable exposure limit, use a NIOSH approved respirator for dusts. A respiratory protection program that meets OSHA's 29 CFR 1910.134 and ANSI Z88.2 requirements must be followed whenever work place conditions warrant a respirator's use. Seek advice from local supervisor.

General hygiene considerations Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Private clothes and working clothes should be kept separately. Contaminated uniforms should be laundered separately from other clothing to prevent potential cross-contamination. If possible, an industrial laundry service should be used to eliminate the possibility of contaminating the home environment. Handle in accordance with good industrial hygiene and safety practices. Observe any medical surveillance requirements.

9. Physical & Chemical Properties

Appearance Solids, Rectangles, Shapes, Tubes, Clips, Shells and Turnings.

Color Yellow to red.

Odor None.

Odor threshold Not available.

Physical state Solid.

Form Solid, Solids, Rectangles, Shapes, Tubes, Clips, Shells and Turnings.

pH Not available.

Melting point Not available.

Freezing point Not available.

Boiling point Not available.

Flash point Not available.

Evaporation rate Not available.

Flammability limits in air, upper, % by volume Not available.

Flammability limits in air, lower, % by volume Not available.

Vapor pressure Not available.

Vapor density Not available.

Specific gravity Not available.

Solubility (water) Insoluble.

Partition coefficient (n-octanol/water) Not available.

Auto-ignition temperature Not available.

Decomposition temperature Not available.

Density 7.5 - 9 lb/in³

10. Chemical Stability & Reactivity Information

Chemical stability Massive metal is stable and non reactive under normal conditions of use, storage and transport.

Conditions to avoid Contact with incompatible materials. Contact with acids will release flammable hydrogen gas. Avoid dust formation. Dust clouds may be explosive under certain conditions.

Hazardous decomposition products Welding, burning, sawing, brazing, grinding or machining operations may generate dusts and fumes of metal oxides. Lead oxide fumes may be formed at elevated temperatures. Aluminium oxides.
Possibility of hazardous reactions
Hazardous polymerization does not occur. Hot molten material will react violently with water resulting in spattering and fuming.

11. Toxicological Information

Acute effects
Harmful by inhalation and if swallowed. Dust may irritate the eyes and the respiratory system. High concentrations of freshly formed fumes/dusts of metal oxides can produce symptoms of metal fume fever.

Local effects
May cause irritation through mechanical abrasion.

Sensitization
May cause sensitization by skin contact.

Chronic effects
Danger of cumulative effects. Prolonged and repeated overexposure to dust and fumes can lead to benign pneumoconiosis (stannosis). Chronic inhalation of metallic oxide dust/fume may cause metal fume fever. Lead may produce maternal toxicity, toxicity to the fetus, and adverse effects to blood, bone marrow, central/peripheral nervous systems, kidney, liver, and reproductive system.

Carcinogenicity
Possible cancer hazard - may cause cancer based on animal data.

ACGIH Carcinogens
Aluminum (CAS 7429-90-5) A4 Not classifiable as a human carcinogen.
Lead (CAS 7439-92-1) A3 Confirmed animal carcinogen with unknown relevance to humans.
Nickel (CAS 7440-02-0) A5 Not suspected as a human carcinogen.

IARC Monographs. Overall Evaluation of Carcinogenicity
Lead (CAS 7439-92-1) 2B Possibly carcinogenic to humans.
Nickel (CAS 7440-02-0) 2B Possibly carcinogenic to humans.

US NTP Report on Carcinogens: Anticipated carcinogen
Lead (CAS 7439-92-1) Anticipated carcinogen.
Nickel (CAS 7440-02-0) Anticipated carcinogen.

US NTP Report on Carcinogens: Known carcinogen
Nickel (CAS 7440-02-0) Known carcinogen.

Epidemiology
Based on epidemiological studies, pre-existing pulmonary disorders may be aggravated by prolonged exposure to high concentrations of metal dust or fumes. Pre-existing kidney, nerve or circulatory disorders may be aggravated by exposure to lead and its compounds. Pre-existing skin conditions including dermatitis might be aggravated by exposure to this product.

Mutagenicity
Contains a substance which may have a mutagenic effect.

Neurological effects
None known.

Reproductive effects
Possible reproductive hazard that may cause adverse reproductive effects based on animal data.

Teratogenicity
Nickel: Has shown teratogenic effects in laboratory animals.

Further information
Lead is accumulated in the body and may cause damage to the brain and nervous system after prolonged exposure. Welding or plasma arc cutting of metal and alloys can generate ozone, nitric oxides and ultraviolet radiation. Ozone overexposure may result in mucous membrane irritation or pulmonary discomfort. UV radiation can cause skin erythema and welders flash.

12. Ecological Information

Ecotoxicological data

<table>

</tbody>
</table>

Ecotoxicity
Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.

Environmental effects
An environmental hazard cannot be excluded in the event of unprofessional handling or disposal.

Persistence and degradability
The product is not biodegradable.

Bioaccumulation / Accumulation
The product contains potentially bioaccumulating substances.

Partition coefficient (n-octanol/water)
Not available.

Mobility in environmental media
Alloys in massive forms are not mobile in the environment.

13. Disposal Considerations

Waste codes
Not regulated.
Disposal instructions
This material and its container must be disposed of as hazardous waste. Dispose in accordance with all applicable regulations.

Waste from residues / unused products
Recover and recycle, if practical. Solid metal and alloys in the form of particles may be reactive. Its hazardous characteristics, including fire and explosion, should be determined prior to disposal.

Contaminated packaging
Not applicable.

14. Transport Information

Aluminum (CAS 7429-90-5) Listed.
Copper (CAS 7440-50-8) Listed.
Lead (CAS 7439-92-1) Listed.
Manganese (CAS 7439-96-5) Listed.
Nickel (CAS 7440-02-0) Listed.
Silicon (CAS 7440-21-3) Listed.
Tin (CAS 7440-31-5) Listed.

US - New Jersey Community RTK (EHS Survey): Reportable threshold
Aluminum (CAS 7429-90-5) 500 LBS
Copper (CAS 7440-50-8) 500 LBS
Lead (CAS 7439-92-1) 500 LBS
Manganese (CAS 7439-96-5) 500 LBS
Nickel (CAS 7440-02-0) 500 LBS

US - New Jersey RTK - Substances: Listed substance
Aluminum (CAS 7429-90-5) Listed.
Copper (CAS 7440-50-8) Listed.
Lead (CAS 7439-92-1) Listed.
Manganese (CAS 7439-96-5) Listed.
Nickel (CAS 7440-02-0) Listed.
Silicon (CAS 7440-21-3) Listed.
Tin (CAS 7440-31-5) Listed.

US - Pennsylvania RTK - Hazardous Substances: All compounds of this substance are considered environmental hazards
Copper (CAS 7440-50-8) LISTED
Lead (CAS 7439-92-1) LISTED
Manganese (CAS 7439-96-5) LISTED
Nickel (CAS 7440-02-0) LISTED

US - Pennsylvania RTK - Hazardous Substances: Listed substance
Aluminum (CAS 7429-90-5) Listed.
Copper (CAS 7440-50-8) Listed.
Lead (CAS 7439-92-1) Listed.
Manganese (CAS 7439-96-5) Listed.
Nickel (CAS 7440-02-0) Listed.
Silicon (CAS 7440-21-3) Listed.
Tin (CAS 7440-31-5) Listed.

US - Pennsylvania RTK - Hazardous Substances: Special hazard
Nickel (CAS 7440-02-0) Special hazard.

16. Other Information

Recommended use Manufacturing
Recommended restrictions Not assigned.
Further information HMIS® is a registered trade and service mark of the NPCA.
Other information None known.
HMIS® ratings
Health: 2*
Flammability: 0
Physical hazard: 0
Personal protection: X

NFPA ratings
Health: 2
Flammability: 0
Instability: 0
